

GRNconnect Hub API

GST Changes - 1st July 2017

- As per the guidelines provided by Indian government, GST is applicable from July 1st 2017 00:00 hrs.
- This is applicable to Indian customers only.
- Starting from July 1st 2017, our prices will be calculated as follows:
 - GST = 18% of service fee
 - Total price = supplier price + service fee + GST
- Starting from July 1st 2017, all Indian customers must update GST number in the profile, without which you won't be allowed to search or make bookings.
- As per the response structure in the api, there are no changes. i.e price_details will be an object of key value pairs(like earlier).
 - Each key representing the charge the value indicates.
 - Each value will be an array of charge details.
- What is changed ?
 - The elements within the price_details
 - "net" will contain Total, SupplierPrice and ServiceFee.
 - "GST" will contain Total, if applicable it will also contain CGST and SGST.
 - Other elements like surcharge, hotel_charges etc will be same as before.
 - This is applicable to all the end points where price_details is part of the response. i.e search response, refetch, recheck and booking.
 - The search price now includes service tax(GST).
 - The "taxes" key at the top level will be removed.

Definition of price details(no change):

price_details	object	Price details. Refer below for more info.
---------------	--------	---

Price Details:

Dynamic key-value pairs, where each **value** is an **array** of charge details. These details are for display purpose only. A compliant implementation is not required to process or interpret these details.

Refer sample price_details below.

Charge Details:

Attribute	Type	Description
name	string	Name of the charge.
included	boolean	'true' if the charge is already included in the price.
amount_type	string	Defines the type of amount: 'value' represents flatfee 'percent' represents percentage
amount	float	flat fee or percentage value.
mandatory	boolean	'true' if this must be paid either at booking or at hotel. Otherwise, this has to be paid(at hotel) only if you need the supplement/facility.
currency	string	Three-letter ISO currency code
comments	string	Description or any notes for the charge if available.
